

The National Space Centre

The SIM

The final challenge in the *Human Spaceflight Experience* is to ride the unique 3D *Spaceflight Induction Module* to Europa. Join the rest of the crew for a briefing session about your journey to the inhospitable ice moon, before boarding the spacecraft for your 3D mission.

Our *Spaceflight Induction Module* is the only one in the UK, seating up to 17 astronauts, you will take a white knuckle ride from the Earth's moon, through meteorite showers and radiation clouds, before the hair-raising ice canyon run on Europa itself.
